Printed Feb 10/2010 goZoom.ca Inc

## Questions ?

Call and talk to goZoom Staff or maybe your question is answered below

**Q:** Will I have any other fees or charges. Do I need a separate phone line ?

**A:** goZoom.ca will not charge you any additional provisioning fees for this service other than the monthly fee for the service itself. The service operates on your current phone line and you can use it for voice at the same time. We can even hook up Highspeed if you don't have DialTone!! Contact goZoom for details on Dry Loop (DSL without dialtone) pricing details.

**Q:** Is there a Modem Rental Fee?

**A:** **As a special offer to "Madawaska Highlands" residents goZoom is Waiving the modem rental Fee if you sign up before May 15<sup>st</sup> we will give you a FREE modem and 3 DSL Filters for your existing telephones.**

**Q:** What does it mean 7x Bell's offering ?

**A:** **goZoom.ca is offering a transfer "limit" of 200 GigaBytes per month. Bell Aliant/Bell Canada is offering 26 GigaBytes per month for a comparable price**

**Q:** But if I go to Bell and I bundle everything I'll Save money!

**A:** Will you? If you work with a bundle of 2 other Bell Services you'll get a \$10 discount according to the Bell promo. So then need to "Top Up" Bell's monthly throughput to equal ours. So add on 174GB based on Bell's pricing and you may find that **going with goZoom, and not Bell, is saving you \$5 or more per month, and that's not including the modem rental fee that Bell will charge you and we're giving you that for free!**

**Q:** Do I REALLY need 200 GB per month? That's a LOT of data.

**A:** Maybe not, but you're finally getting Highspeed – do you want to worry about a small limit like 26GB, and huge overage charges ? No, you want to see what the Internet can *really* do and not worry about it right?

goZoom even has an unlimited throughput plan for another \$5 per month!
